

Exploring pathways to

What this survey is all about

Thank you for participating in the ParEvo exercise up to now. In this survey we are seeking your evaluation of the ideas that you and others generated. **Your responses are an essential final step, enabling all of us to obtain more value from the exercise you have been involved in**

It does not matter how many, or how few, contributions you have made during the exercise, we still need your views.

Please try to complete the survey by the end of this week (7th August). You can come back and correct your responses at any time within this period. There are nine questions, that should take around 15 minutes to complete

We will feed back the aggregated results of this survey to all participants. While we do ask for your email address below, this information will not be disclosed in any summary of the survey results.

If you have any concerns, queries, or technical problems, before, during or after doing the survey, please contact rick.davies@gmail.com

1. Who you are...

1. Please tell us your email address (so we know who has completed the survey)

Please re-visit the completed ParEvo exercise, via this (removed) link and keep a window open so you can look at it while answering the questions below.

2. Please look back at the surviving storylines (the ones that reached iteration 6 at the end)

Then choose the **one** storyline which describes events which you think are **most likely** to happen - and tick the "**most likely**" button for that one.

Then choose the **one** storyline which describes events which you think are **least likely** to happen - and tick the "**least likely**" button for that one.

Then use the Comment space underneath to explain the reasons behind each of your two choices

	Most Likely	Least Likely
Storyline 40	<input type="radio"/>	<input type="radio"/>
Storyline 41	<input type="radio"/>	<input type="radio"/>
Storyline 42	<input type="radio"/>	<input type="radio"/>
Storyline 43	<input type="radio"/>	<input type="radio"/>
Storyline 44	<input type="radio"/>	<input type="radio"/>
Storyline 45	<input type="radio"/>	<input type="radio"/>
Storyline 46	<input type="radio"/>	<input type="radio"/>

Why do you think so? Storyline #x is least likely because... Storyline #y is most likely because...

3. What did you think was the **most surprising** event or characteristic that you saw **within one or more of the storylines**?

Tell us what was surprising. Then put the ID number of one or more contributions, where you saw this happening.

4. What did you think was the **most surprising** event or characteristic that you noticed was **absent from any of the storylines**?

5. Which of the **contributions by other participants** were *most likely to influence* how you decide to approach research uptake (e.g. by how you chose to do something or by choosing not do something)

Please provide the ID numbers for these contribution, and your explanation(s) for this choice. More than one choice is okay

6. How **realistic** do you think **other' participants's contributions were** to the storylines, overall?

Very unrealistic Neither / hard to say Very realistic

7. On average, how many minutes did you spend during a single iteration reading, then adding your own new contribution?

0 minutes 60 minutes >120 minutes

8. How much did you enjoy reading the storylines and then adding your contributions to the storylines?

Not all Hard to say Very much

9. Do you have any comments you would like to make on the **exercise process**?

Thank you very much for completing this survey!

If you want to , you can come back and edit the contents of your responses to this survey until the date of it's closure (15th August 2022)

With best wishes, Rick Davies, ParEvo administrator
